KEEP IT FRESH

Stretch your produce and dollars by knowing how to store fresh fruits and vegetables. The **American Heart Association** recommends 2 cups of fruit and 2.5 cups of vegetables per day.

Generally:

Fridge temperature should be at 40° F or below. Always refrigerate cut or peeled produce. Store vegetables and fruits separately. Keep apples, bananas, broccoli, cauliflower, cucumbers, onions, pears, potatoes and watermelon away from other produce, as they can affect how quickly other items ripen and rot.

Pantry

Pack away in a cool, dark place like your pantry or cellar:
